About Us

CAMA, is a Tehran based company, working in producing, importing and exporting natural stones. Its founders, with more than 10 years of experience in the natural stone industry, established CAMA in 2014 with a vision to become the leaders in exporting Iranian natural stones. The wide variety of products sourced both locally and internationally, as well as the well equipped factories (modern Italian machineries) and high production capacity, has enabled CAMA to become one of the pioneers in the natural stone industry.

In order to ensure the highest quality for our customers, we search the globe for the finest natural stones and import our products after we personally examine each block. Additionally, with our internal products, we directly monitor the production process of slabs which are sourced from supreme quality quarries across Iran.

To meet our main goal, which is providing our customers with the best service, our team of experts will assist you during every step of your journey, from design and finding the right product to delivery and implementation.
